

***WaneShear* Technologies is seeking qualified SolidWorks machine designers and SolidWorks detailers.**

WaneShear Technologies is located in Ukiah, California. We manufacture high technology lumber production equipment for markets all around the world. We are housed in a brand new 25,000 square foot manufacturing facility with all new state of the art CNC equipment and fabrication equipment. The WaneShear (www.waneshear.com) is a revolutionary development that improves both lumber production and quality. The WaneShear system processes lumber at a rate never seen before in the lumber industry.

We are looking for qualified designers and detailers to join our team and to grow with our business. If you are a motivated person that would like to work on state of the art products and get in on the ground floor of a growing company, then you may be just what we are looking for. If you are proficient with SolidWorks and have a mechanical background, you may be what we are looking for.

We are hiring both engineers and non-engineers that have the desire to be the best that they can be and work in an exciting environment helping to develop the next generation of lumber production equipment.

We also hire interns from engineering schools and work to help educate these people and give them a taste of the real world manufacturing environment. Of course, we want them to come back after graduation and join our team full time.

If you are looking for a new challenge and the opportunity to work on new product development and support of existing products, then please do not hesitate to contact us to learn more and schedule an interview.
